

Zeyad Alameri

Junior Full Stack Developer

Email: zeyadalameri77@gmail.com | Phone: +967 770 526 248

GitHub: <https://github.com/zeyadalameri> | Location: Sana'a, Yemen

Professional Summary

IT graduate with full-stack development experience building web applications, automation systems, and mobile apps. Developed and deployed production Telegram systems at New Smart Technology using Python and Flask. Experienced in building real-time message processing systems, REST APIs, and scalable backend solutions.

Education

Sana'a University - Bachelor of Information Technology

Graduation: 2025 | GPA: 82% (3.6/4.0)

Technical Skills

Programming Languages: JavaScript, Python, PHP, Dart, C#, C++

Backend Frameworks: Node.js, Flask, Laravel, ASP.NET

Frontend Technologies: HTML5, CSS3, Bootstrap, React

Mobile Development: Flutter, Dart

Databases: MySQL, PostgreSQL, SQLite, Firebase

APIs & Web Services: RESTful APIs, JSON, HTTP/HTTPS, CRUD Operations, API

Tools & Platforms: Git, GitHub, Linux, Windows, XAMPP

Core Computer Science: OOP, MVC Architecture, Data Structures & Algorithms

Projects

SmartBook Telegram System

Full Stack Developer | New Smart Technology | 3 months

- Developed and deployed a production-ready Telegram automation system.
- Built backend processing system using Python and Telegram API.

- Developed a Flask dashboard for real-time monitoring and system tracking.
- Integrated external REST APIs for data processing and system communication.

Technologies: Python, Flask, Telegram API, REST APIs, JSON

Smart Shopping App (Graduation Project)

Mobile Developer | Flutter Team

- Built a location-based mobile application using Flutter and Dart.
- Integrated REST APIs for real-time nearby store offers.
- Applied MVC architecture with controllers, models, and service layers.

Technologies: Flutter, Dart, REST APIs, Location Services, Firebase

WhatsApp Automation Bot

Node.js Developer

- Developed a real-time WhatsApp bot using Node.js and whatsapp-web.js.
- Implemented automated message handling and response logic.

Technologies: Node.js, whatsapp-web.js

Professional Experience

Software Developer Intern

New Smart Technology | Sana'a, Yemen

Oct 2025 - Jan 2026 (3 months)

- Developed and deployed a production backend system for Telegram automation.
 - Built message processing pipelines and integrated external APIs.
 - Designed and implemented monitoring features using Flask.
 - Collaborated with development team on system design and deployment.
